

Beech Leaf Disease: options for small landowners

October 18, 2026 | 1:00pm | Chesterfield, NH

Join landowners Craig Houghton and Beth Brantley on their Atherton Hill Road property in Chesterfield for a lively discussion about combating Beech Leaf Disease and to learn more about the efforts they have undertaken so far.

American Beech, a major component of northern hardwood forest and vital food source for wildlife, is under threat throughout southern New Hampshire.

What practical options do small woodland owners have to maintain ecological function, health and diversity?

This event is free. Space is limited and registration is required. Register via email at chesterfield.conservation@gmail.com or by text at (603) 491-2728. Detailed directions will be provided upon registration.
